Efficiency PSU 1U

Government & Military

- Designed specifically for demanding application in OEM and military operations
- Ideal for vital military applications, such as C4ISR and virtual training applications
- Integrated with Mil-Spec standards to be operate in several kinds of harsh and criticals environments, including explosives testing.

Test & Measurement

- Recommended for MPEG-2 transport stream analysis solution
- Measurement systems provides high speed distributed data acquisition for today's demanding testing environments
- Provides an open platform for OEM's, ODM's, Systems Integrators for their embedded-software/hardware applications

Education

- Rugged construction ensure maximum durability and long service life
- Cloud computing for continuous learning on a 24/7 basis for teacher and student in the cloud environment
